Re: International Registration of the Kurdish Horse

Your Excellency,

I would like to congratulate you on the successful achievement of the International registration of the Kurdish horse. This is a very important watershed for the progress of international relations in this highly significant venture. This achievement will be recognised and regarded strongly by the international horse community especially given your country has a proud and long connection with the horse.

Horses have proven to be an area that so many countries have a common bond through and have for generations helped bridge cultural divides by giving commonality of interest. It is now well recognised globally that Sheik Mohammed bin Rashid al Maktoum, along with his brothers, are the leading horse breeders in the world and what they have achieved worldwide from their base in Dubai is quite extraordinary. I am sure all in the Australian horse industries would be equally thrilled to see Iran emerge in a global scale in a similar way.

Again, congratulations on this momentous step that has been warmly received by an extensive group of people from around the world.

Yours Sincerely,

Paul Higgins.
Stud Proprietor.
